## Photo Gallery from Jen's Classroom

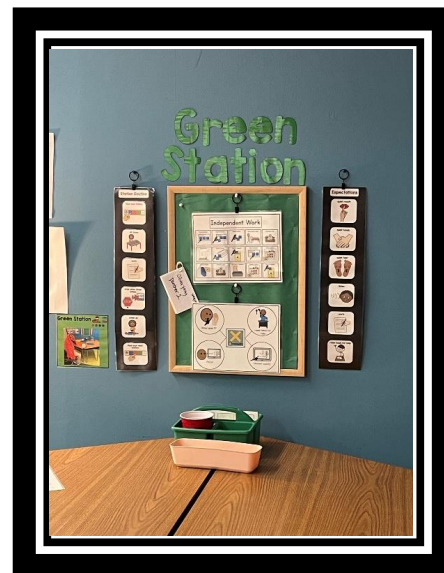

Station mini schedules and reinforcement visuals

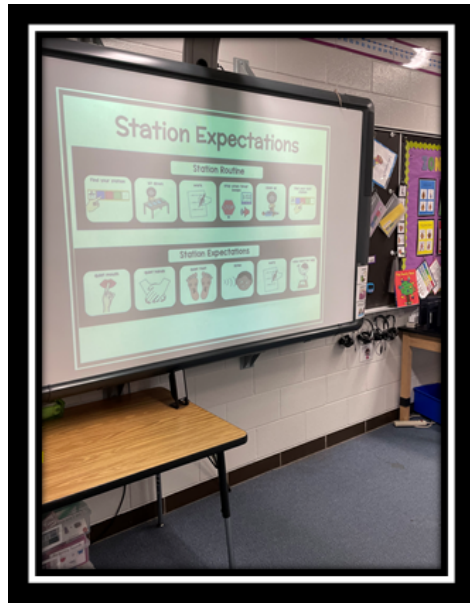

Station mini schedules are used to show students what station is next and when they will earn their reinforcer

Station expectations are presented on the board and reviewed before breaking up into stations

Station visuals are presented on the board as well as "I can" statements so students understand what skills they will be working on in each station

All stations include expectation visuals as well as mini schedules showing what the student is expected to do in each station.
